

There are many different ways to drive distracted  
Do a single one, and someone's life could be impacted  
There are cell phones, music, and turning up the heat  
Allow them to distract you and you will be off the street  
We live in Maine, where roads can be covered in ice  
Send a text while driving and you might pay the price  
Maine is a state with many moose, bears, and deer  
Pay attention at night, or into an animal you may veer  
From teenagers to the elderly, we live social lives  
But phone calls while driving are not the way to survive

Distracted driving isn't the only danger  
Drink and drive and you could kill a stranger  
Many people like parties, they drink wine and beers  
But no one has the right to cause another family tears  
Some drive impaired, yet they don't care  
It is like they think we have lives to spare  
Designate someone to be sober and drive  
In the US each year this would save 10,000 lives

You only live once, that's our motto  
Make safe choices before getting in your auto
